# WHAT WE DO

With one of the largest repair workshops in the UK - representing a three million pound investment - we have extensive knowledge and engineering expertise and can offer a complete spectrum of services, no matter the size of your business. At CPM we care about flexibility, reliability and quality which ensures that our customers experience minimised downtime and increased performance levels at the lowest cost.

# WHO ARE CPM ENGINEERING

CPM is a 24 hour electro-mechanical repair and maintenance Service Company, based in Manchester, with over 25 years of experience servicing the North-West's rotating plant and mechanical assets.

We deliver proactive and reactive maintenance services for rotating industrial machines to support our customers objectives including CBM programmes to stop equipment failing in the first place, complete maintenance packages to insure customers against failures, repair services or where necessary the best solution replacement.

Our philosophy of sharing our Root Cause Failure experience with our customers and having access to over 2000 records via our Trade Association EASA, puts us in a unique position to increase MTBF (Mean Time Before Failure).

## GEARBOXES

CPM's unique philosophy of 'Repair, Replace, Manage and Maintain' has been developed to cover all aspects of rotating machine maintenance.

## PUMPS

**REPAIR** ➤  
We use certified best practice techniques to overhaul and refurbish your equipment, either from our own 15 tonne capacity workshop or at your works. All repairs are carried out to OEM standards by our highly trained workforce.

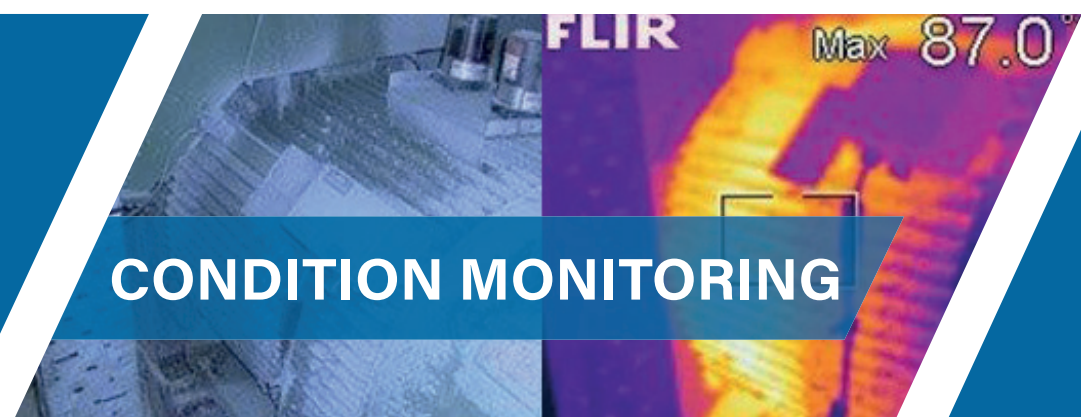

⬅ **REPLACE**  
We offer an identical or modern equivalent machine as a replacement where your existing one is beyond repair or where a replacement would be more cost effective or energy efficient. Replacements can also be the answer when 'engineering out' repetitive problems. After years using 'Root Cause Failure Techniques' to ascertain why machines fail, we have the expertise that ensures we can advise on replacements where necessary.

## MECHANICAL

**MANAGE** ➤  
For optimum performance we offer an 'Asset Management Programme' tailored specifically for each customer's individual needs: including technical support, customer reports and step by step feedback. All these services are available with a fixed term price contract. We will insure our customers against failures by switching costs from repairs to proactive maintenance services.

⬅ **MAINTAIN**  
To increase 'Mean Time Between Failures (MTBF)' a tailor-made Maintenance Strategy using the correct technology including Vibration Analysis, Ultrasound, Oil Analysis, Thermography etc. we can ensure you receive the right maintenance at the right time.

## CONDITION MONITORING

# OUR UNIQUE PHILOSOPHY

## WHAT DO OUR CUSTOMERS SAY ABOUT US?

“ I just wanted to send a quick email to everybody at CPM who was involved with the rebuilding of our sump pump over the weekend, superb service. ”

PRODUCTION MANAGER - PAPER MILL (MIDLANDS)

“ Thank you for the response over the weekend, great service. ”

HEALTH & SAFETY MANAGER - MINERAL PROCESSING COMPANY

“ Excellent service, an excellent network of staff, always helpful, honest and willing to help. ”

MAINTENANCE ENGINEER, INTERNATIONAL CHEMICAL MANUFACTURER
